

# BIOMEDICAL FUZZY AND HUMAN SCIENCES

---

Volume 3, Number 1, September 1997

---

<b>Medical Applications of Fuzzy Logic in Pattern Recognition</b> Metin Akay, Attila Medl and Gregory Ciresti	1-10
<b>A Pointing Device Using Hand and Fingers Equipped with a Multi-color Tracker</b> Asuka YAMAKAWA, Takeshi OHTANI, Hidetomo ICHIHASHI and Tetsuya MIYOSHI	11-20
<b>Fuzzy Control for Reduction of Acceleration and Vibration of a Stretcher-cart on an Ambulance</b> Mikio MAEDA and Shuta MURAKAMI	21-30
<b>A New Prediction of Nasal Tip Projection Resulting from Le Fort I Osteotomy by Means of Fuzzy Inference</b> Ichiro MASUI, Hisao TANAKA and Takeshi HONDA	31-38
<b>Animal-like Behavior Design of Small Robots by the Model of Subjective World and Behavior</b> Tadashi KITAMURA	39-46
<b>Theoretical Approach to Actin-Myosin System as an Example of Complex System</b> Hiroyuki MATSUURA and Masahiro NAKANO	47-52
<b>Optimum Apportionment of Letter Presentation Time in an Auditory Display Based on Time-Continuous Model of Short-Term Memory</b> Hideki KAMA and Hirokazu YOKOI	53-64
<b>Application of Fuzzy Theory to Inference of Human Laughing Degree</b> Daisuke DATE and Takehisa ONISAWA	65-76
<b>Independence of Functions of Verbal Hedges from Modificands</b> Ayumi YOSHIKAWA	77-82
<b>Fuzzy Principal Component Analysis and Its Application</b> Yoshiyuki YABUUCHI and Junzo WATADA	83-92
<b>Special Lectures of "Fuzzy Theory" for Medical Students</b> Hirokazu IIDA, Akihiko MIYAKE, Seizaburo ARITA, Hiroshi SUDA and Hajime YAMASITA	93-96
<b>Fuzzy Logic for the Diagnosis of Surgical Site Infection by the Weighted Membership Functions</b> Seizaburo ARITA, Yoshimi HORI, Hiroshi HIROTA Masaharu MIZUMOTO and others	97-102
<b>SEM Panoramic Views of Chaotic Bifurcated Bronchioles and Aggregated Alveolar Patterns of the Lung</b> Teruyuki HOJO	103-106
