

BIOMEDICAL SOFT COMPUTING AND HUMAN SCIENCES

Volume 4, Number 1, October 1998

- Biologic Dynamic Processes Modeling Based on Chaotic Fuzzy Systems**
Horia-Nicolai Teodorescu, Abraham Kandel and Adrian Brezulianu 1-10
- On Teaching Fuzzy Systems to Students in Medical Sciences and BME**
Horia-Nicolai Teodorescu, Abraham Kandel and Daniel Mlynek 11-14
- Projection Pursuit Switching Regression for Analysis of Psychological Feelings**
Tomohiro Ohta, Asuka Yamakawa, Hidetomo Ichihashi and Tetsuya Miyoshi 15-21
- Actin Myosin Systems Based on the Stochastic Resonance**
Hiroyuki Matsuura, Masahiro Nakano and Nobuo Noda 23-31
- Logistic Regression Analysis of Inherited Polymorphism as Modulators of Stomach Cancer**
Masahiro Nakano, Takahiko Katoh, Makoto Yoshioka, Shin Takasawa, Naoki Nagata and Hideaki Itoh 33-41
- Computer-assisted Diagnostic System for Ultrasonography Using Fuzzy Reasoning -Improvement with Analytic Hierarchy Process-**
Takemasa Tanaka and Shigenobu Kanda 43-48
- Optimum Apportionment of Letter Presentation Time in a Visual Display Based on Time-continuous Model of Short-term Memory**
Hirokazu Yokoi 49-58
- Fractal Dimensions of Thyroid Tumors on Contrast Enhanced Computed Tomograms**
Yasuhisa Chiba and Hitoshi Ogata 59-63
- Image Retrieval System Based on Subjective Interpretation**
Kaori Yoshida, Toshikazu Kato and Torao Yanaru 65-74
