

# BIOMEDICAL SOFT COMPUTING AND HUMAN SCIENCES

---

Volume 5, Number 1, September 1999

---

**Optimum Apportionment of Letter Presentation Time in a Visual-Audio Display: Preliminary Results**

Hirokazu Yokoi

1-13

**cDNA Cloning of Inducer Reactive Protein in Adult T-Cell Leukemia Cells by Applying the Fuzzy Set Cloning Theory for Sequencing Defuzzification**

Megumi Aso, Yoshiya Tanaka, Koji Kimata, Takeshi Hirano, Nobuyuki Yanagihara, Sumiya Etoh and Hideyasu Hirano

15-20

**Adaptive Fuzzy DSS for Surgical Fluid Replacement**

Wai-kwong Chan and Fazel Naghdy

21-26

**Supporting System for Tongue Inspection in Traditional Chinese Medicine Using the Fuzzy Theory**

Tadashi Watsuji, Seizaburo Arita, Shoji Shinohara and Toshikatsu Kitade

27-31

**Consideration for Density Optimization and Dose Reduction of Digital Dental Imaging System Using Fuzzy C-Means Clustering**

Takemasa Tanaka, Toshiyuki Kawazu and Shigenobu Kanda

33-38

**An Approach to Construct an Emotional Dialogue System Based on Subjective Observation**

Naruki Shirahama, Torao Yanaru and Kazunori Miyamoto

39-48

**Capturing Hand Tremors with a Fuzzy Logic Wheelchair Joystick Controller**

Berend-Jan van der Zwaag and Dan Corbett

49-55

**Theoretical Analysis of a Schema Co-Evolutionary Algorithm**

Kwee-Bo Sim and Hyo-Byung Jun

57-65

**Fuzzy Control Concept of Artificial Pneumatic Muscle**

Petar B. Petrović and Vladimir R. Milačić

67-72

**Belief Updating Recurrent Fuzzy Rules for Ordered Dataset Modelling**

Jim F. Baldwin, Trevor P. Martin and Jonathan M. Rossiter

73-78

**A Matching Method of 2-Dimensional Projected Attractor of Chaos such as Biomedical Phenomenon**

Akikazu Tamaki

79-82
